

Florida State University

Film & Literature Conference 2008

January 31-February 2, 2008

Cyborg Science and Virtual Materialities in Literature and Film

The 2008 FSU Film and Literature Conference attempts to explore ways of "**translating**" across "**cultures**," broadly construed, whether they be "**scientific**," "**humanities**" or "**technologically**" oriented cultures, or multicultural or regional or national notions of "**culture**," as well as "**high culture**" and "**popular culture**," to name only a few possibilities. It aims to promote critical and constructive dialogue across these various conventional divides.

Conference timing coincides with the live taping of the *2008 Ballroom and Beyond* TV Show, sponsored by FSU's International Center.

Sponsorship Program:

Platinum (1 page color ad)
